

Basic Queries — Warming Up

1. Select all columns from the dataset
 - a. `SELECT *`
 - b. `FROM superstore;`
 2. Show only orders from the West region
 - a. `SELECT *`
 - b. `FROM superstore`
 - c. `WHERE region = 'West';`
 3. Show all orders where a discount was applied
 - a. `SELECT *`
 - b. `FROM superstore`
 - c. `WHERE discount >0;`
 4. Count the total number of orders
 - a. `SELECT COUNT(*)`
 - b. `FROM superstore`
-

Aggregations

5. Calculate total sales, total profit, and total quantity across all orders
 - a. `SELECT`
 - b. `ROUND(SUM(sales), 2) as Total_Sales,`
 - c. `ROUND(SUM(quantity), 2) as Total_Quantity,`
 - d. `ROUND(SUM(profit), 2) as Total_Profit`
 - e. `FROM superstore`
6. Find average profit per order
 - a. `SELECT COUNT(*) AS Total_Orders,`
 - b. `ROUND(AVG(Profit), 2) AS AVG_Profit_Per_Order`
 - c. `FROM superstore;`
7. Show total sales and profit grouped by Region
 - a. `SELECT Region,`
 - b. `ROUND(SUM(Sales), 2) AS Total_Sales,`
 - c. `ROUND(SUM(Profit), 2) AS Total_Profit`
 - d. `FROM superstore`
 - e. `GROUP BY Region`
 - f. `ORDER BY Total_Profit DESC;`
8. Show total sales and profit grouped by Category
 - a. `SELECT Category,`
 - b. `ROUND(SUM(Sales), 2) AS Total_Sales,`
 - c. `ROUND(SUM(Profit), 2) AS Total_Profit`
 - d. `FROM superstore`
 - e. `GROUP BY Category`

- f. ORDER BY Total_Profit DESC;
 - 9. Count the number of orders per Ship Mode
 - a. SELECT Ship_Mode,
 - b. COUNT(*) AS Ship_Mode_Orders
 - c. FROM superstore
 - d. GROUP BY Ship_Mode
 - e. ORDER BY Ship_Mode_Orders DESC;
-

Filtering and Sorting

- 10. Show all orders where profit is negative, sorted by profit ascending
 - a. SELECT Order_ID,
 - b. Product_Name,
 - c. Category,
 - d. Discount,
 - e. ROUND(Profit, 2) AS Profit
 - f. FROM superstore
 - g. WHERE Profit < 0
 - h. ORDER BY Profit ASC;
 - 11. Show the top 10 customers by total sales
 - a. SELECT customer_name, SUM(sales) as Total_Sales
 - b. FROM Superstore_Sales_Analysis
 - c. GROUP BY customer_name
 - d. ORDER BY Total_Sales DESC
 - e. LIMIT 10;
 - 12. Find all orders with discount greater than 0.4
 - a. SELECT Order_ID,
 - b. Discount,
 - c. Profit,
 - d. Product_Name
 - e. FROM superstore
 - f. WHERE Discount > 0.4
 - g. ORDER BY Discount DESC;
 - 13. Show total losses (negative profit only) by Sub-Category
 - a. SELECT Sub_Category,
 - b. ROUND(SUM(Profit), 2) AS Total_Losses
 - c. FROM superstore
 - d. WHERE Profit < 0
 - e. GROUP BY Sub_Category
 - f. ORDER BY Total_Losses ASC;
-

Intermediate

14. Find the most profitable product (by total profit)
 - a. SELECT Product_Name, ROUND(SUM(Profit), 2) as Total_Profit
 - b. FROM superstore
 - c. GROUP BY Product_Name
 - d. ORDER BY Total_Profit DESC
 - e. LIMIT 1;
15. Calculate profit margin per order (Profit divided by Sales)
 - a. SELECT Order_ID,
 - b. Product_Name,
 - c. ROUND((Profit / Sales) * 100, 2) AS Profit_Margin_Pct
 - d. FROM superstore
 - e. ORDER BY Profit_Margin_Pct DESC;
16. Show yearly sales and profit trends grouped by Order Year
 - a. SELECT Order_Year,
 - b. ROUND(SUM(Sales), 2) AS Total_Sales,
 - c. ROUND(SUM(Profit), 2) AS Total_Profit
 - d. FROM superstore
 - e. GROUP BY Order_Year
 - f. ORDER BY Order_Year ASC;
17. Find which Customer Segment generates the most revenue
 - a. SELECT segment, ROUND(SUM(Sales), 2) as Revenue
 - b. FROM superstore
 - c. GROUP BY Segment
 - d. ORDER BY Revenue DESC
 - e. LIMIT 1;
18. Show average discount by Category
 - a. SELECT category, ROUND(AVG (Discount) * 100, 2) as AVG_Discount
 - b. FROM superstore
 - c. GROUP BY Category
 - d. ORDER BY AVG_Discount DESC;
